

Big questions from Little Learners

Children start asking a lot of questions around age 3, when the left side of their brains starts to mature.

It's a good sign that their mind is expanding. In addition, it shows that their analytical skills are improving every day. Some of their questions can be surprisingly difficult to answer in a way that's age-appropriate.

This series of colourful books aims to help parents to answer the most common questions in simple and gently amusing ways.

Features

- Hard back, light weight board book
- Lift-the-flaps spread
- 8 full colour spreads
- 180 mm high x 140 mm wide.
- 12 mm spine width.
- Spot pearlescent foil and deep embossing on matt laminated cover.

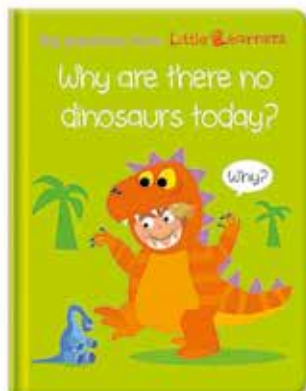

Titles currently available.

144 full colour pages.

Why is the sea so salty?

There are always
many ions
in the sea.
So many
ions now
in the sea, you can
see them.

Pages from the chapter:
Why is the Sea Salty

We aim to educate young children
in innovative and entertaining ways.
Our wish is to promote a deeper,
more considerate, and empathetic
view of our wonderful world and
all it's amazing inhabitants.

It is our sincere hope that our books
will have a lasting, positive impact
on children and influence the
choices they make in the future.

Where possible we will minimise the use
of non biodegradable materials
in everything we create.
