# TUMMY TIME BOOKS

Good for baby's body and brain

*Selected by UK charities BookTrust and Scottish Book Trust to gift to every newborn in England, Northern Ireland and Scotland.*

*Tummy Time!* is a very first book designed for young babies to encourage tummy time and stimulate their developing brains. It folds out to create a panorama of images. One side has high-contrast images proven to be mesmerising for tiny babies with developing vision. The other has photos of babies because babies love looking at other babies. There's a mirror, too, because babies love looking at themselves!

*Reading Time* is a book that encourages parents to lie down with their babies during tummy time and **read to them from birth**. The fold-out panorama features ten high-contrast images and first words accompanied by a nursery rhyme that babies will love. There's a mirror, too, to say goodnight (or hello!) to one another.

*Playtime!* is a book that **turns tummy time into playtime**. At birth, a baby's world is a blur of light and dark and moving forms. They are attracted to high-contrast images, faces and movement, so this finger-wiggle book is a perfect first book. Make rabbit's ear prick up, puppy's tail wag, or turn your finger into a wiggly worm. Where will it pop out next?!
